WATERPROOF FLOORING SYSTEM

HOW IT WORKS

RevWood Plus combines the power of three advanced technologies to create a revolutionary waterproof flooring system, allowing you to enjoy the beauty of wood in any room of the house—even mudrooms, kitchens and baths.

Mohawk’s Uniclic®, the industry’s leading glueless locking system, snaps together for fast and easy installation. The innovative system maintains constant tension between planks for tight joints that trap water on the surface, protecting your floor and subfloor.

Traditional milled edges are susceptible to water damage, but Mohawk’s GenuEdge® pressed bevels allow the surface visual and protective coating to wrap over the plank’s edges, enhancing the hardwood realism while protecting the core from moisture.

To further protect your floor, the perimeter of each RevWood Plus plank is coated with Hydroseal™, repelling water to resist swelling from moisture.

SOPHISTICATED STYLE FOR EVERY ROOM

Choose from distressed designs or opt for natural hardwood character in colors ranging from cool grays to warm browns. Whether your taste is modern, classic or rustic, you are sure to find the perfect look for any room in the house.
